

Create Node-RED Service

TEAM ID :- PNT2022TMID44065

The image shows two screenshots of the Node-RED service on IBM Cloud. The top screenshot is the landing page for 'Node-RED on IBM Cloud' at the URL `node-red-bugeu-2022-11-04.eu-gb.mybluemix.net`. It features a red header with the 'Node-RED' logo and the tagline 'Flow-based programming for the Internet of Things'. Below this, there is a description of Node-RED as a programming tool for wiring together hardware devices, APIs, and online services. A button labeled 'Go to your Node-RED flow editor' is present, along with a link to 'Learn how to customise Node-RED'. The bottom screenshot shows the Node-RED flow editor interface. The left sidebar contains a 'filter nodes' search bar and two categories of nodes: 'common' (including inject, debug, complete, catch, status, link in, link call, link out, and comment) and 'function' (including function and switch). The main workspace, titled 'Flow 1', displays a simple flow with an 'inject' node connected to a 'msg.payload' node. The right sidebar shows an 'info' panel with a 'Search flows' input and a list of flows, including 'Flow 1' which is selected. Below this, the 'Flow 1' details panel shows the flow ID '95f3f234aa82d995' and instructions on how to import a flow by dragging its JSON or using the `ctrl-i` shortcut.
